Operating Conditions of Fittings

Fluid State	Max. Operating Pressure (MPa)
Steam / Air / Gas / Oil: Up to 300°C	1.0
Steam / Air / Oil / Pulsating Water: Up to 200°C	1.4
Static Flow Water: Up to 120°C	2.0

Part Number Example: **SGPPT8A** - L

Part Number Example: **SGPNR8A** - L

Part Number Example: **SGPNR8A** - 75

*Pulsating Water is a stream of water that is generated under steady operating conditions and variation of pressure and flow rate occurs in cycles. (Except for transitional change).
 *Static Flow Water is a non-pulsating stream of water.
 *As fittings are cast products, () dimensions such as (D) and (L2) are for reference, not guaranteed.

Low Pressure Steel Pipe Fittings (Equal Size Pipe Threads)

Unions / Cross / Flange / Flange for Welding / Blind Flanged for Welding / 3-Way Elbow

Feature: These fittings can be removed by loosening the nuts, and thus, require no twist of pipes themselves.
